Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1,9,12,18 are objected to because of the following informalities: the claimed limitation "beverage" as recited in claim 1, lines 10 and 14, claim 9, line 2, claim 12, lines 7,9, and in claim 18, lines 9,13 and 17 should be --the beverage-- to prevent double inclusion throughout the noted claims. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3,6-12,15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Krimmel et al. 5,497,917.

Krimmel et al. disclose a beverage container (20) for retaining a volume of beverage, which comprises a wall defining a cavity (26) in which beverage is contained, a rim (please note: the rim is the tip end of the container) defined along an upper edge of the wall the rim defining a mouth as seen in Figure 2, a lid (10) at least partially extending over the mouth, valve structure (16) on the lid defining a valve port (60) extending through the lid for communicating with the cavity of the container, a valve grommet (44) positionable in the valve port, the grommet defining an aperture communicating with the valve port for facilitating flow of beverage through the aperture and valve port into the cavity, a flexible tongue (130) extending from the grommet and

at least partially extending into the valve port and movable relative to the valve port for facilitating flow of beverage into the cavity and resisting reverse passage of beverage therethrough (col. 6, ll. 11-19), the grommet further comprises a flange (48) extending around the grommet for engaging the valve port, the grommet being formed of a flexible material for flexible engagement with the valve port in the lid and for flexible disengagement therefrom to facilitate sealing of the valve port and removal and replacement to facilitate cleaning of the lid as seen in Figure 4, a recess (124), a reservoir (126). The device shown by Krimmel et al. will perform the method recited in claim 18 during normal operational use of the device.

Allowable Subject Matter

4. Claims 4-5,13-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

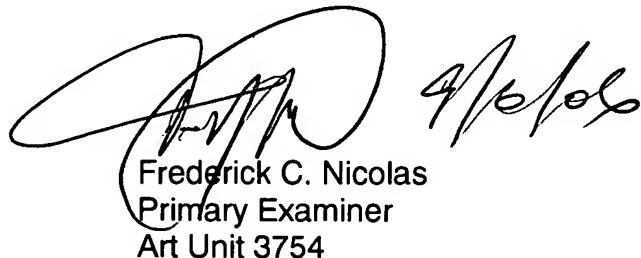

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Doron et al. 6,805,266, Geroult et al. 6,216,754, Collins 5,037,015, Patel 5,653,362 and Nybakke 6,648,183 disclose other types of beverage container.
